

Double Action Core Biopsy Systems MBD™

Helping Answer Life's
Most Important Questions®

US Biopsy offers a powerful and reliable, yet economical biopsy solution: the MBD-23 device. Our MBD-23 biopsy device is compatible with our CBN needles and Introducer and allows exact placement of the tip and sample notch of the needle into the lesion. The MBD-23 device employs a two-stage mechanism so that the needle does not need to be removed to obtain tissue sample. The MBD-23 made of stainless steel, aluminium and engineered resin, can be sterilized by multiple methods.
