

SABD™ Coaxial Kit

Helping Answer Life's
Most Important Questions®

Features	Benefits
A precise match between the SABD and the introducer allow exact placement of the tip and sample notch of the needle into the lesion.	The sample notch is always fully exposed whether the Trocar or Bevel tip is selected.
The hub of the introducer comes to complete stop against the nose of the SABD.	All Introducer are equipped with a threaded luer cap to ensure the stylet does not backup as dense tissue is entered.
The sample notch is always fully exposed whether the 10mm notch or 15 mm notch is selected.	

Cs Kit Product No.	Description	Per Box
SABD-1409-15	SABD 14gx 09cm,20mmT bevel tip 13gx07cm"S" style Introducer	5
SABD-1409-15-T	SABD 14gx 09cm,20mmT trocar tip 13gx07cm"S" style Introducer	5
